WHAT CHANCE

DOES THE WORLD HAVE?

The future of the world is in his hands. How well this youngster and his colleagues are educated may determine the course of history.

It is up to us to give the world the best possible chance by giving our future citizens the best possible college educations.

Even now some of our colleges are overcrowded. In less than ten years, the number of applicants will double.

To maintain the quality of our higher education, we shall have to recruit and train thousands of professors. We will also need many more classrooms with the most advanced educational aids, more comprehensive college libraries, new laboratories with the latest scientific equipment.

Some students are now excluded from college, or given inferior education, because we neglected to see the problem. We must act to provide our youngsters with more and better college facilities and the finest college training possible.

Help the college of your choice now. Help it to expand and improve its facilities and to pay its teachers the salaries their high calling deserves.

If you want to know more about what the college crisis means to you and what you can do to help, write for a free booklet to Higher Education, Box 36, Times Square Station, New York 36, N. Y.
